Backwash filter & domestic water station

Clean drinking water - throughout the house

Your advantages

- DVGW certification applied for
- without follow-up costs
- Long service life thanks to high quality processing
- Easy backwashing
- Low maintenance
- With pressure reducer - saves water

Clean drinking water -

Important for the whole family

On the long way from the water processing systems to the tap, some unwanted dirt such as rust particles or grains of sand gets into the drinking water.

This is not only questionable from a hygienic point of view, it also causes damage to household appliances and fittings and, in the worst case, leads to a pipe break.

DIN 1988-200 shows the importance of drinking water hygiene. According to this standard, a drinking water filter is mandatory in every building.

Protect yourself, your family, your drinking water installation and your household appliances - for a safe home

Small filter - big effect

Safe drinking water in every household

The magnetic drinking water filter has a head made of plastic and a rotatable connection flange made of brass. Installation is therefore possible both vertically and horizontally. The sophisticated jet nozzle technology ensures perfect cleaning during backwashing. The filter fabric is made of high-quality stainless steel.

← Your drinking water filter can be cleaned easily and effectively

Ihre Vorteile

- + The integrated jet nozzle cleans the filter reliably
- + There is no need to change a filter candle, which saves time and money
- + Optionally with an integrated pressure reducer, you can save water and protect the environment.

The right filter for every building

	Backwash filter		Domestic water station with pressure reducer	
Connection	1" / DN 25	1 ¼" / DN 32	1" / DN 25	1 ¼" / DN 32
